

Why beep? Speak out!

Bluguard Smart Bus P900 V series

V series

with **voice feedback**

The Smart Home System that provide Voice Notification Report

A Seamless Control of Home Security and Home Automation System

Compared to tone alarm security system, V Series is enhanced with state-of-the-art voice feedback to ensure you and your loved ones live in total comfort and safety.

Innovative Voice Notification

With V Series, there are no more confusing beeps, buzzes and multiple tones to remember. The innovative voice notification will report on the status of each zone. For instance, when you press a button to disarm the main gate which has been preset as Zone 1, the speaker of the control panel will announce "Zone 1 disarm." Even while you are away, managing the control and updates of the status of your home is just a phone call away. Simply dial a dedicated number which connects you to your home's control panel and interact with to the voice feedback.

All-in-one for Control, Comfort and Safety.

Turn interior and exterior lights on and off. Independently arm or disarm individual security zones when you're at home, all in a single touch. And because the system's status is always reported through a voice notification, you are always aware of your home's level of protection and the arrangement of your home appliances.

In addition to the innovative **Voice Notification**, advantages of V Series include:-

User-friendly Interface

- **One-touch System**

Arm/disarm, switch on/off or get the status of individual zones at the touch of a button.

Scalable and Customizable

- **Protection Upgrade**

Increase protection zones for a more comprehensive security assurance such as additional sensors, PIR motion detectors, fire and smoke detectors, lightning surge protection up to 4KV, etc.

- **Smart home upgrade with Home Automation Module**

Conveniently control and manage your home appliances such as lightings, air-conditioners and other appliances whether you're at home or away.

- **Telephony backup with GSM**

In case of tampered fixed lines or line disruptions, the system acts as a backup to SMS or call all pre-set numbers and report on your home's status. Compatible with all mobile networks.

Industry Proven & Reliable

- **Quality Assurance**

As one of the high quality flagship products of Bluguard, V Series meets even the most stringent standards of the home security industry. Backed by extensive research and development, all Bluguard Smart Bus range of products are developed based on innovative platform technologies and expertise.

For a security enhanced smart home system with voice notification that makes secured and comfortable living a reality, contact one of our sales team today!

ACCESSORIES

GSM

If you're spent thousands of dollars on the security system and it's obviously you want reassurance that the system will be updated to you anytime.

GSM is the additional upgrades module that acts as the backup line if the conventional telephony fails. Thus, you can be reporting to you via the calls or SMS reporting.

GSM is a dualband module and can be utilized by connect a single SIM card (e.g Maxis, Digi, Celcom).

It provides:

- * Voice feedback to your personal mobile
- * Contact ID to CMS centre
- * SMS reporting

Home Automation Module

Have you think of switching on Air-Cond before you arrive home? Do you have idea of switching on your lights at home when you're abroad?

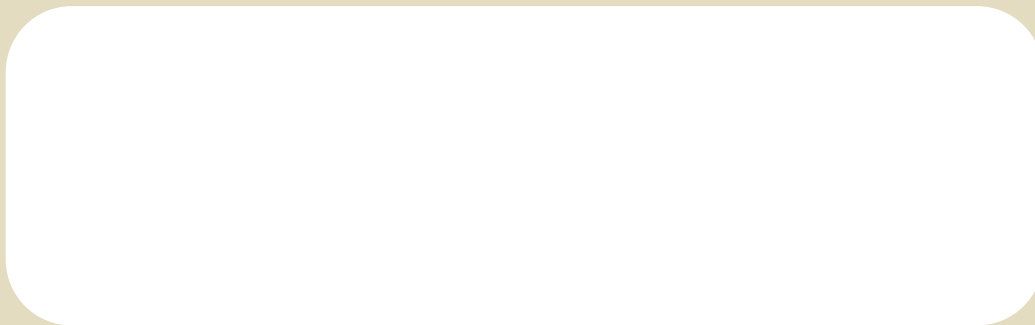

You have options to choose a more comfort world by integrated the home automation module that automated your home appliances (e.g Air-cond, lights, etc). Now, you can configure on the system to turn on the appliances on the specific time or remotely control via mobiles while you're away from home.

anytime, anywhere...it's all in your hand
